ZOEY 2.4 3G.

User Manual

Content

1   Welcome

Thank you for purchasing this cellular phone.

To guarantee your cellular phone works properly, please follow the instructions in this manual to prevent any possible incidents or malfunctions.
Follow all safety warnings to avoid injury or property damage.

Screen displays and illustrations in this user's manual are designed to help you operate your phone to its optimum performance.

We continuously strive to improve our products. Therefore, we reserve the rights to revise this user manual or withdraw it at any time without prior notice.

2　Your phone

2.1　Phone overview

2.2   Functions of Keys

1	Earpiece	9	Ending/Power key
2	Display	10	# key
3	Left soft key	11	Camera
4	Dial/Answer key	12	Speaker
5	Keypad	13	The battery cover
6	* key		
7	Navigation key		
8	Right soft key		

Number keys, * key and # key

Press number keys 0 through 9 to input or edit state to input numbers and characters;

The # key and the * key represent different functions in different states or different function menus.

Hold the # key up to 2s in standby state to activate or deactivate the silent mode.

Press the # key in edit state to switch between input methods.

Pressing the * key in edit status to select a symbol.

Press * key twice can input "+" in standby interface. When the symbol "+" appears, press the * key quickly to input "P" or "W". "P" and "W" are used for calling the extension; "+" are used for dialing an international call. Hold the 0 key to turn on or off the torch.

3   Getting started

3.1   Installing the SIM Cards and the Battery

An SIM card carries useful information, including your mobile phone number, PIN (Personal Identification Number), PIN2, PUK (PIN Unlocking Key), PUK2 (PIN2 Unlocking Key), IMSI (International Mobile Subscriber Identity), network information, contacts data, and short messages data.

3.2   Linking to the Network

After the SIM card and the mobile phone are successfully unlocked, the mobile phone automatically searches for an available network. After finding a network, the mobile phone enters the standby state. When the mobile phone is registered in the network, the name of the network operator is displayed on the screen. Then you can dial or receive a call.

4   Input method

This mobile phone provides multiple input methods, including English input and numeric input. You can use these input methods when editing the phonebook, short messages, files and so on.

4.1   Icons for Input Methods

After you enter an edit window such as a window for editing the phonebook, short messages or the memorandum, an icon is displayed to indicate the current input method:

4.2   To Shift Entry Methods

Press the # key to switch between input methods.

4.3   Inserting a Symbol

Press the ***** key to enter the **Select symbol** interface, use direction keys to select a symbol you want.

5   Using the Menus

5.1   Contacts

You can store the name and telephone number in the phone memory or the SIM card.

Up to 1000 pairs of numbers and names can be stored in the phone memory. The storage capacity of the SIM card is determined by the type of the card.

5.2   Call logs

Through this function, you can view a list of missed calls, dialed calls and received calls etc.

Delete all

You can delete the latest call records. Choose **Delete call logs** and then select to delete all the numbers in the call history, or delete only the numbers in the missed calls list, the dialed calls list or the received calls list.

Call timers

Choose **call timers** to view the last call time, the total time of all dialed calls and the total time of all received calls, and/or to reset all the time.

GPRS counter

Access this menu to view the sent or received GPRS volume or to reset counter.

5.3   Settings

Profiles

The mobile phone provides multiple user profiles, so that you can customize some settings to adapt to the

specific events and environments.

Customize the user profiles according to your preference and then activate the user profiles. The user profiles fall into four scenarios: Normal, Silent, Meeting,Indoor and Outdoor.When you insert an earpiece to the mobile phone, the mobile phone automatically enters the Headset mode.

Display

Users can access this item to set wallpaper, screen saver, contrast, power on/off display, keypad backlight time, auto keypad lock etc.

Date & time

Set the date format, the time format, and detail time of the location.

Phone setting

Users can access this item to set language, shortcut, Auto power on/off schedule, power manager,browser selection etc.

Call settings

Dual-SIM: Dual-SIM refers to two SIM card slots, and the two cards can standby at the same time or set one of them to display on the idle screen.

Caller ID: You can set caller ID as set by network , hide ID or send ID .

Call waiting: You can start up or shut down the function. When it is started up, even when you are making a call, you can also receive another income call.

Call divert: this network function enables you to forward incoming calls to another number you have previously specified.

Call barring: The call barring function enables you to bar calls as needed. When setting this function, you need to use a network barring code, which can be obtained from the network operator. If the code is wrong,

an error message will be prompted on the screen. After selecting a call barring option, continue to select Activate or Deactivate. The mobile phone will prompt you to input the call barring code and then contact the network. A moment later, the network will make a response and send the operation results to the mobile phone.

Auto redial: Set it to **On** or **Off** to enable or disable auto redial.

Call time reminder: To set single or circle tone in a call to make you know the time.

Connections

Contact the network operator to obtain the following network services:

Network selection: Set Network selection mode to Automatic or Manual. Automatic is recommended. When Network selection mode is set to Automatic, the mobile phone will prefer the network where the SIM card is registered. When Network selection mode is set to Manual, you need to select the network operator's network where the SIM card is registered.

Security

This function provides you with related settings about safety use.

Restore factory settings

Use this function to restore factory settings. The preset password is 0000.

5.4   Internet

This function enables you to view the internet. Your phone will ask you with existed way. You can start to view only by starting corresponding way.

5.5   Message

Send SMS or MMS to the selected item.

5.6   Fun & Games

We have two games：Sokoban and Snake，you can play by press in someone.

5.7   Multimedia

Camera

The phone is provided with a camera, which supports the photographing functions. Roll the phone to align the camera to the picture and then press OK key to capture photos. Pictures will be saved in the file system of the phone or the memory card. In the capture interface, you can press up or down direction key to zoom in and zoom out; left or right direction key to settings.

DV

This function enables you to record dynamic pictures. In the capture interface,   press up or down direction key to zoom in and zoom out; left or right direction key to settings,OK key to capture videos clip.

Image viewer

You can view the pictures or images through this function.

Audio

Use this function to play audio files. By pressing the direction key can you control the playing process of audio player: play/pause(ok key),switch to last song/next song (press left or right direction key). In audio

player interface, you can press up or down key to tune volume.

Video

Use this function to play video files. By pressing the direction key can you control the playing process of video player: play/pause(ok key), fast forward (press right direction key) and rewind (press left direction key). In video player interface, you can press up or down key to tune volume.

Sound recorder

You can record MP3, AMR & WAV format audio files through this function. The AMR takes the compression algorithm. So in the same memory condition, it has longer recording time than WAV. Press **OK key** to start Recording.

FM radio

You can use the application as a traditional FM radio with automatic tuning and saved channels. In FM radio interface, you can press up or down key to tune volume, press ok key to play/pause the playing process of the current channel, press left or right key to switch last/next channel.

File manager

The phone provides a certain space for users to manage files and supports the Memory card. The capacity of the Memory card is selectable. You can use the file manager to conveniently manage various directories and files on the phone and the Memory card.

5.8   Organizer

Calendar

Once you enter this menu, there is a monthly-view calendar for you to keep track of important appointments, etc. Days with events entered will be marked.

Calculator

The calculator can add, subtract, multiply and divide. To use the calculator.

Memo

Use this function to create new memo,

Clock

Five alarm clocks are set but deactivated by default. You can activate one, multiple or all of them as needed. For each alarm clock, the ringing date and the ringing time can be set.

Currency converter

The exchange rate conversion should first enter the exchange rate, and then enter the national currency value, and press the left soft key OK, in another edit box displays the values you want to.

Ebook reader

E-book reader enables you to read TXT file.

Flashlight

Press 0 key to turn on or off in the idle screen.

Bluetooth

With Bluetooth, you can make a wireless connection to other compatible devices, such as mobile phones, computers, headsets and car kits. You can use the Bluetooth to send images, video clips, music, sound clips and notes, and transfer files from your compatible pc.

5.9   STK

STK service is the tool kit of SIM card. This phone supports the service function .The specific items are depended by SIM card and network. Service menu will be auto added to the phone menu when supported by network and SIM card.

FCC Regulations:

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular

installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

FCC Note:
Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Information (SAR)

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 15 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR.
The SAR limit set by the FCC is 1.6W/kg.

This device is complied with SAR for general population /uncontrolled exposure limits in ANSI/IEEE C95.1-1992 and had been tested in accordance with the measurement methods and procedures specified in IEEE1528.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: YHLBLUZOEY243G.

For this device, the highest reported SAR value for usage against the head is 1.39 W/kg, for usage near the body is 1.29 W/kg.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements.

SAR compliance for body-worn operation is based on a separation distance of 15 mm between the unit and the human body. Carry this device at least 15 mm away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 15 mm between this device and your body.

RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and use such body-worn accessory should be avoided.

IC Notice

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:
(1) l'appareil ne doit pas produire de brouillage, et
(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en

This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

IC: 11492A-ZOEY243G

IC Radiation Exposure Statement

This EUT is compliance with SAR for general population/uncontrolled exposure limits in IC RSS-102 and had been tested in accordance with the measurement methods and procedures specified in IEEE 1528 and IEC 62209. This equipment should be installed and operated with minimum distance 1.5 cm between the radiator and your body. This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

Cet appareil est conforme aux limites d'exposition DAS incontrôlée pour la population générale de la norme CNR-102 d'Industrie Canada et a été testé en conformité avec les méthodes de mesure et procédures spécifiées dans IEEE 1528 et IEC 62209. Cet appareil doit être installé et utilisé avec une distance minimale de 1.5 cm entre l'émetteur et votre corps. Cet appareil et sa ou ses antennes ne doivent pas être co-localisés ou fonctionner en conjonction avec tout autre antenne ou transmetteur.
